

The STS-11HC provides unmatched dust suppression with all of the capacity and performance you have come to expect from the global leader in Laser Screed® and Material Placement machines. With a max capacity of 5,000 lbs./2,268 kg and the ability to load topcoat materials in both the head and bulk bin, this spreader is an essential tool in large-scale commercial and industrial flooring markets. For exceptional maneuverability around the job site, this machine is equipped with four-wheel, two-wheel, and crab steering modes. To maximize productivity, this machine is able to place topcoats, when extending and retracting the boom, without the use of stabilizers.
